Federal Trade Commission Alert: Tech Support Scams

In a recent twist, scam artists are using the phone to try to break into your computer. They call, claiming to be computer techs associated with well-known companies like Microsoft. They say that they've detected viruses or other malware on your computer to trick you into giving them remote access or paying for software you don't need.

These scammers take advantage of your reasonable concerns about viruses and other threats. They know that computer users have heard time and again that it's important to install security software. But the purpose behind their elaborate scheme isn't to protect your computer; it's to make money.

For more details on how to avoid this type of scam click on the image below.

WEEKLY FIRE REPORT
