August 7th, 2017, Better Business Bureau Alert -

The BBB name and logo are being illegally used in an on-going phishing scam. The emails look a lot like notice of a complaint from BBB, but contain links to malware that can infect your computer or steal your passwords. Please be assured BBB is working with law enforcement as well as a private deactivation firm to shut down as many criminal websites as possible. To date, we have shut down well over 100 sites. *Below is a copy of what the fraudulent email looks like:*

-----Original Message-----

From: Linda Cole [mailto:arie_kam@012.net.il]

Sent: Monday, August 07, 2017 10:39 AM

To: [REDACTED]

Subject: Case:459585309739:928 Harlan Foods, Inc.

Dear Paul Hayden.

This email notification has been automatically sent to you because Better Business Bureau has got an abuse, claiming that your company Harlan Foods, Inc. is violating the Fair Labor Standards Act.

You can download the text file with the explanation of compliant by following the link: [REDACTED]

We also request that you send a short response within 48 hours to us. This response should contain info about what you intend to do with it.

Important notice:

When replying to us, keep the abuse ID "Case:459585309739:928" native in the subject line.

Better Business Bureau
Compliance Department

If you get an email that looks like it is a BBB complaint, here is what you should do:

1. Do NOT click on any links or attachments.
2. Read the email carefully for signs that it may be fake (for example, misspellings, grammatical errors, generic greetings such as “Dear member” instead of a name, etc.).
3. Be wary of urgent instructions to take specified action such as “Click on the link or your account will be closed.”
4. Hover your mouse over links without clicking to see if the address is truly from bbb.org. The URL in the text should match the URL that your mouse detects. If the two do not match, it is most likely a scam.
5. Send a copy of the email to phishing@council.bbb.org (Note: This address is only for scams that use the BBB name or logo)

6. Delete the email from your computer completely (be sure to empty your “trash can” or “recycling bin,” as well).
7. Run anti-virus software updates frequently and do a full system scan.
8. Keep a close eye on your bank statements for any unexpected or unexplained transactions.
9. If you have clicked on any of the links within the email, *immediately* change your email and network passwords AND notify your local IT provider for next steps and actions.

If you have a business and are not certain whether the complaint is legitimate, contact your local BBB (bbb.org).
