

goalsOBJECTIVES

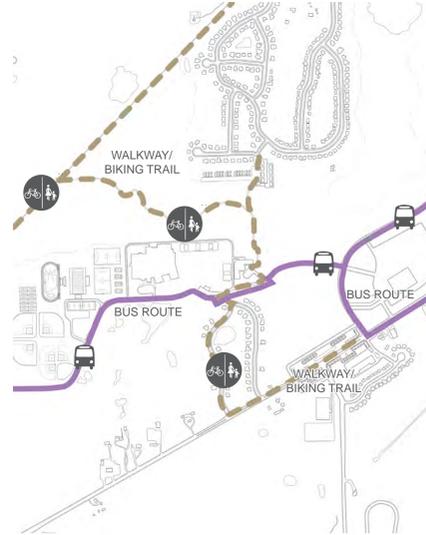

Limiting Sprawl by Mixed Use

Located at the south end of the High Tech Archipelago, the site shapes the edge condition of developed area of Pittsfield Township and preserved nature. To avoid future sprawl of the neighborhood, we proposed a new village center on Michigan Ave. that absorbs the need of further development toward the south of the site. Also, the neighborhood is enriched by surrounding natural environments that offers bucolic atmosphere to residents living in the community.

To create mixed use neighborhood:

1. Provide a multiple functions that fulfils daily needs.
2. Articulate segmented neighborhoods via walkways and bike ways to create a bigger mixed use community.
3. Create a public transit system to connect to further neighborhoods with other functions in the township and Saline.
