Environmental Health Review Waiver

For Non-Sewage Generating Stand Alone Structures Only

All Other Improvements Will Require Environmental Health Approval

I _____ being the owner/authorized agent of property known
(Printed Name)

as _____
(Street Address) (City) (Zip Code)

Submit this form as a waiver from the Environmental Health Division Review process for my proposed building project, which will consist of

(Project description)

By making this waiver request, I take full responsibility for any problems that occur as the result of the above referenced construction with regard to the well and septic system on this property. As a condition of receiving this waiver, I agree that all of the following statements are true:

- This project is a non-sewage generating stand alone structure – i.e. Deck, garage, barn, above ground pool, porch.
- This project will occur on a parcel greater than 2.0 acres in size.
- This project will not involve construction activities within 15 ft of the septic tanks or drain field.
- This project will not involve construction activities within 5 ft. of the well
- I have located my septic system and identified my future septic field area and water supply and take full responsibility if the improvements encroach on these systems.

I understand that if this construction project encroaches on the existing septic system, existing well, or future areas for well and septic system, the structure may be required to be demolished.

I understand that if the existing well or septic system is encroached or damaged, that my building permit will be revoked.
